ABOUT US:

Capture ISG was formed in 1991 to service organizations in need of research and assist them gain actionable information. In 2019, Capture ISG began to develop tools for the Vocational Rehabilitation service space. Using the same techniques cultivated over 30 years and our strong belief in the process and integrity of information collected, we developed tools for state VR agencies, state rehabilitation councils, and service providers to hear what their participants had to say and to expand and modify services through that actionable information. We believe our tools help our clients succeed and amplify informed choice for the participants.

CORE COMPETENCIES:

QUESTIONNAIRE DESIGN

- Complete start-to-finish guidance
- Choose from a questionnaire library
- Create your own questions
- Quantitative & Qualitative feedback

DATA COLLECTION
